

The Flag-Man's Knot

A knot-tying diagram

This is a complicated knot even for a great knot-tier! If you don't have the time to work on it, or can't figure it out, call us at 1-888-697-3524. For a small charge we can tie your knot for you here at Gettysburg Flag® Works.

We would love to offer instructions, but because this knot is so complicated, a diagram is the best way to show you how to tie it. We do have a few tips. Start about 1/3 of the way down the cord and keep the 2 sides of your chord parallel to each other as you tie it to keep you knot flat. You will need to adjust and tighten the links to be uniform. Once your knot is tied, push the top loop through a screw eye on your flagpole and then drop the tassels and knot into the loop to hang it on your indoor flag set.
